Results

AI feasibility pretest | descriptive

4 models • 20 fictional chains/model • 24 weeks • 104/104 responses accepted

Model	H1: pipeline-proxy difference	H2: cost difference
GPT-6 Luna	+0.0000	+0.00
GPT-5.6 Luna	-0.0083	+17.85
GPT-5.6 Sol	+0.0000	+0.00
Claude Haiku 5.5	-0.0146	-19.40

All differences = strong − no pressure. H1: lower follows prediction; H2: higher follows prediction.

Two models had identical outcomes across the pressure conditions.

No enforced time restriction; chains generated jointly. H3/H4 education contrasts were not collected.

These results do not establish statistical significance or human decision-time effects.
