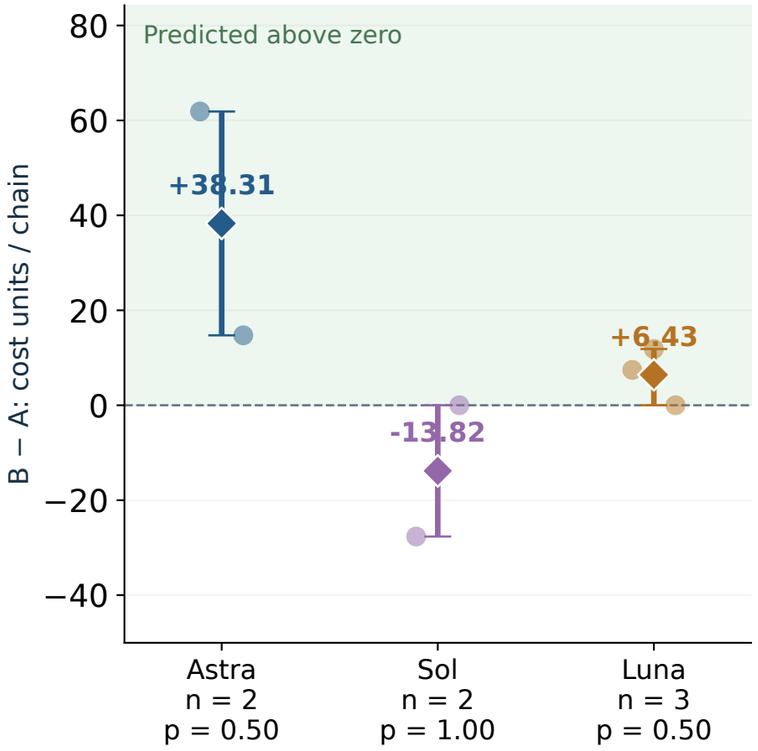
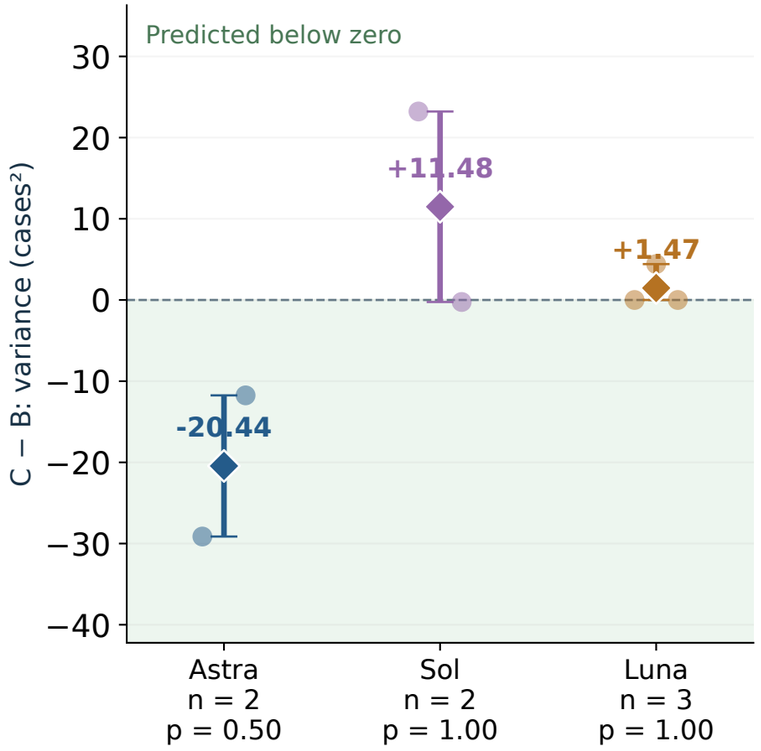
Model comparison: final reviewed results

Small dots = separate runs · Diamonds = model means · Bars = descriptive 95% bootstrap intervals

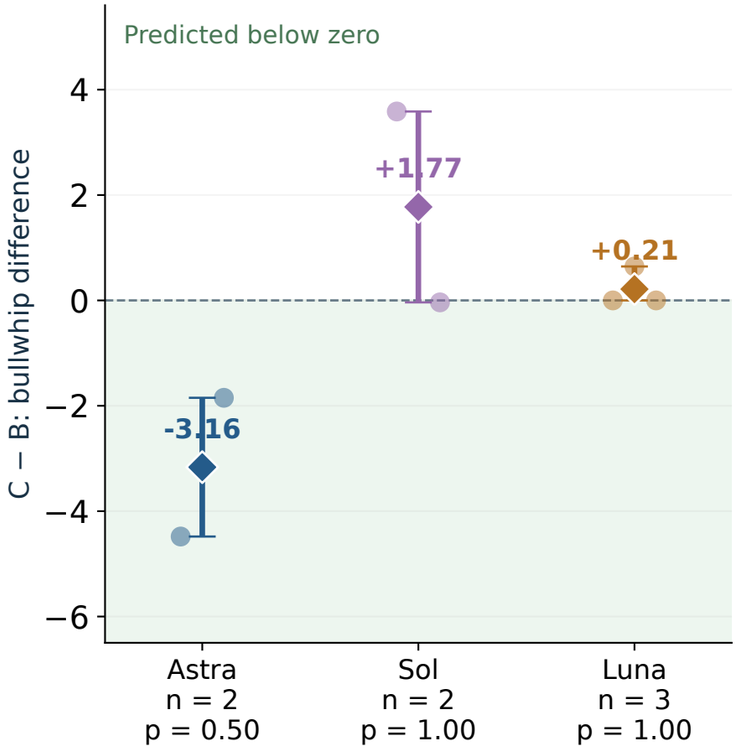
H2 Total cost



H4a Order variance



H4b Bullwhip ratio



Same reviewed runs as the statistics table: Astra 2, Sol 2, Luna 3. No lines connect independent rounds.

A = control + revision B = control + one decision C = causal education + one decision

Printed p-values are raw, two-sided exact tests; all Holm-adjusted p-values = 1.00. Bootstrap bars are descriptive in this small sample.
